

Subject Index

- AChE** 59, 143, 235
 δ -ALA-D in different organs 193
Alkanes, volatile 213
Animal toxicology of cyclosporin A 107
Aryl hydrocarbon hydroxylase 177
Autoradiography, whole body 79
Autoradiography, electromicroscopical 185
Axon degeneration
 by organophosphates 235
Axons, spinal cord 143
- Bronchial epithelium cells, human** 265
Butylated hydroxytoluene 41
- Cadmium in breast milk** 207
Cadmium nephropathy 49
Carbon tetrachloride metabolism, oxygen dependence of 213
Carcinogenicity 107, 265
Chlorate 249
Chlorinated paraffins 79
1-Chloro-2,4-dinitrobenzene 41
Chloroform 289
Chlorohexadecane 79
Cholinesterase inhibition, serum 59
Cincinnati Psychoteratogenicity Screening Test Battery 253
Cyclosporin A 107
- Diethylstilbestrol** 245
Dimethoxyethyl phthalate 71
Diphenhydramine 33
Distribution and excretion 1, 9, 33, 49, 79, 165, 289
4-DMAP 275
DNCB 41
- Endogenous copper** 165
Enzyme induction 177
Epichlorohydrin 71
Erythrocyte rigidity 249
Ethane 213
Exhalation of $^{14}\text{CO}_2$ 79
Exposure chambers 143
- Fenofibrate** 151
Food coloring 253
Formaldehyde 71
- β -Galactosidase** 297
 β -Glucuronidase 297
Glutathione S-transferase activity 41
Glycerol α -monochlorohydrin 71
- Hair follicles, human** 265
Hemodialysis and hemoperfusion (Pharmacokinetics) 17
Hemolysis 249
Hemoperfusion 17, 87
Hexane impurities 59
Histology 107, 151
Human embryonic lung cells in culture 245
Human volunteers 151, 275
Hydroxylamine 59
- Immunosuppression** 107
Interaction between Zn, Hg and Se 165
- Keratinocytes, hair follicle** 265
- Laboratory animals (normal rats and mice not mentioned)**
 – Dogs 275
 – "Gunn" rats 225
 – Hens 235
 – Monkeys 107
 – Quail, Japanese 79
Lead 193
Lipid peroxidation 213
Liver biopsies of patients 151
- Mercury** 165
Metabolism of DMAP 275
Metallothionein 165, 185
Metallothionein, ^{125}I -labelled 185
Methemoglobin 249, 275
Methylmethane sulfonate 71
Microglobulin, β_2 - 49
Morpholine vapour inhalation 143
Morphometry 151
Mushroom poisoning 87
Mutagenicity 107
- Nephrotoxicity** 49, 87, 107
Neurotoxic esterase 59, 235
Neurotoxicity 59, 235, 297
Nitrite 143
- Orellanine** 87
Organophosphates 59, 235
- 2-PAM (Pralidoxim)**
Pentane 213
Peroxisomes, liver 151
Pharmacokinetics 1, 9, 17
Poisoning, human
 – Chloroform 289
 – Diphenhydramine 33
 – Mushroom species 87

- Polychlorinated biphenyls 177
Polychlorinated dibenzofurans 177
Protein binding 245
Proteinuria, tubular 49
Psychotoxicity 253
Pyrethroids, synthetic 297
- Renal function parameters (Cadmium) 49
Retinol 225
- Selenium 165
Sniffing (Chloroform) 289
Sperm 71
Steroid hormones (binding to proteins) 245
Subcellular distribution of metals 165
- Teratogenicity 107
Testicular sperm head counting 71
2,3,7,8-Tetrachlorodibenzo-p-dioxin
(TCDD) 177, 225
Thallium 1, 9
²⁰¹Tl⁺-scintigraphy 1, 9
Transplacental carcinogen 245
Triglyceride-lowering agents 151
- UDP-glucuronosyltransferase activity,
hepatic 225
- Vitamin A 225
- "Yusho" disease 177
- Zinc 165
